RAILINGS AFTER

WOOD PLANTERS BEFORE

ALUMINUM PLANTERS AFTER

ARCHITECTURAL METALS SUPPLIER FOR OUTBACK LOCATIONS NATIONWIDE

American Products, Inc. (API) has supplied over 200 Outback remodel locations in 12 months, including handrails, louvers, awnings, planters, brake metal and more. API has also supplied materials on their new stores, including all of the above plus utility gates, ceiling grids, dining soffits and more.

API worked extensively with Outback to create products that met the design needs of their remodel design. Due to maintenance issues and expensive maintenance costs, Outback wanted to convert many products, such as handrails and louvers, from wood to aluminum. These discussions led to API also producing planters, awnings and brake metal to replace their wood products.
