

FABRICATION

FABRICATION & ASSEMBLY SOLUTIONS

API's state-of-the-art fabrication facility & single-source capabilities make API a preferred supplier and fabricator to the **commercial construction industry**.

FABRICATION

FABRICATOR, MANUFACTURER & SUPPLIER

American Products, Inc. (API) is a specialty manufacturer and supplier of storefront, entrances, and curtain wall systems as well as architectural metals such as sun control, ACM, and other building products. Headquartered in Tampa, FL, API boasts over 625,000 square feet of office, manufacturing, assembly and property facilities.

API offers complete fabrication services for all types of aluminum framing systems, including pre-glazed unitized systems. You can ship API your aluminum and glass or choose from one of API's many stick or unitized systems.

THE PROCESS

API starts with your shop drawings to create fabrication drawings that will be submitted to you for approval. Upon approval, API will factory fabricate your required glazing system on its state-of-the-art automated CNC and integrated sawing assembly-line for the most precise fabrication available.

API's fabrication facility offers strict quality control processes, including multiple random tests, that are adhered to from start to finish.

DELIVERY OF MATERIALS

Subject to anchoring and installation methods, along with the type of glazing system, API can ship its material or the material you provided to us in the following manner:

- Pre-fabricated and knocked down for the installer to assemble onsite.
- Fully assembled and ready for install.
- Fully assembled and pre-glazed.

Partnering with API to fabricate your next project can decrease costs, shorten dry-in times, greatly improve fabrication quality, and reduce onsite labor requirements.

Contact API today to see how we can impact your project budget and/or simply provide you with the resources needed to complete your project on time.
