

V-GROOVE

V-Groove Storefront, Cladded Entrance Doors, Display Doors & Trim

Steel Without & With V-Groove

90° Sharp Corners Distinctive, High Quality Look

American Products, Inc. (API), a national storefront and architectural metals supplier, offers V-Grooved metals to meet your design needs on storefronts, curtain walls, entrances, fixtures and much more. API's V-Grooving technology produces the crisp, clean, sharp bends required by designers that want their projects to have that distinctive, high quality look. Typically, cutting, welding, grinding and polishing is required to achieve this look, which is difficult, time consuming and very costly. But not anymore! API provides a wide variety of V-Grooved metals that include steel, brass, oil rubbed bronze, and more!

Contact Forrest Tatlock at (813) 925-0144 to find out how our cost-effective V-Grooving technology can be used for your next project!
